ENVIRONMENTAL MANAGEMENT POLICY

PREMIOVIN SOLUTIONS NIGERIA LIMITED is poised to achieve the highest standard of environmental safety across its services which covers Procurement of Industrial Equipment, Well Services: Slickline (BHP services), Pumping Services (stimulation services), Surface Well Testing, Perforation Services, Eline Services, Perforation and Well Integrity Evaluation, Coil Tubing Services and Gyro Services and on all her jobsites.

To achieve this mission, PSNL top management is committed to:

- The protection of the environment and the prevention of pollution.
- Conducting her operations in compliance with all applicable laws, regulations, permits and approved environmental guidelines and standards.
- Complying with all agreed clients and interested parties requirements.
- The continual improvement of its environmental management system to enhance her environmental performance.

PSNL shall ensure the following:

- All PSNL activities is performed in an environmentally friendly and sound manner.
- No activity shall commence until the environmental implications are thoroughly considered and addressed.
- A high level of environmental awareness is maintained within the jobsite.
- Employees are encouraged to ensure that environmental concerns are addressed during job planning and execution.
- Special attention will be given to the preservation of the air, soil, water, plant, and animal lives from the impact of our activities.
- All waste generated during our project is gathered, treated, and disposed of in accordance with PSNL waste management plan. Generated wastes shall not be dumped into the environment.
- Adequate controls are put in place to reduce and where possible, eliminate the impact of these nuisance such as noise, dust, smell, vibrations etc.

Employees are encouraged to maintain good housekeeping throughout and at the end of every activity. **PSNL** goal on every project is to ensure that every job site is left as near its original state as possible, at the end of project activities.
